Section 1

The principle part of this method is briefly this: to remember any thing in History, Chronology, Geography is a word is formed, the beginning being the first syllables or syllable of the thing sought, done by frequent repetitions, of course draw after it the latter part, which is so continued ad to give the answer. Thus in History the deluge happened in the year before Christ two thousand three hundred and forty-eight, this signifies by the words Deluge Del: standing for deluge and eto after 1848. The first thing to be done is to learn exactly the following series of vowels and consonants, which are to represent the numerical figures, so as to be able at pleasure, to form a technical word, which shall stand for any number, or to resolve a word already formed into the number which it stands for: a c e o u u a e o i e ou y.
