New York, March 24, '35

Dear Sir:

I received yours by Mr. Carr and am glad to hear that your work is in progress. With respect to a change in the north front, I do not think it can be done, without injury to the purposes of the building, since very large apertures are required for light over the door. By reducing the height of the lower story we bring the tails of the windows of 2 story in "Odeon" high above the floor, so that there will be an indignant look out at them, but by paneling the whole space between the pilasters of N. front we may pierce any of the panelers for light. Besides we give a common place character by insertion ordinary factory-like
