Chapel Hill, N.C., Sept. 1, 1845

My dear Sir,

As a meeting of the students a few days since the undersigned were appointed
a committee to deliberate upon what measures must be taken
with respect to the erection of a building, the objects of which
were made known to the Executive Committee during the last
session.

We therefore met, and in compliance with their request and in accordance with the contents of the letter received from you last spring to wit, that the material and dimensions of the building should be stated, communicated the following:

The material of which the house is to be built is to be of brick. The dimensions are 75 by 35. There are to be 6 windows in front and a large door, 7 windows behind, and 3 in one end and in the other three are to be a small room with a passage between, leading into the main room, a plan of which I will be enclosed.

We are very anxious to know what is the result of the deliberations upon the petition that was sent to the Executive Committee. You stated in your letter that it was to be laid before the trustees.

We sincerely hope that it has met with their cordial approval, as it is indispensable to all that such a building is much needed at the University.

You will greatly oblige us by imme-
