Altered to contemplate will be made and the mechanics discharged until the
completion of the work. The Carpenter who
would be retained in the service of
The University for ordinary or extra-
ordinary repairs.

The New West East Buildings are
heated by hot water. There is the
condition of this separator in each
of these buildings that the walls, ceil-
ings, and other fixtures, can not be
applied in the winter of winter until there
is complete repair of flues. These flues
are made. With very thoughts that these
building would not be ready in the
early days of the opening and to make
the repairs now would add very
largely to the expenditure. An analysis
and condition of your finances it
was prudent to hold one until cost
be more abundant.

The same remarks are applicable
to the chemical laboratory under
the library, under the University library.
The estimate will be large and
costly and the opinion is expressed
that when made it should be in the
form of permanent by removing
a badly decayed wood floor and
