Auger Hill, Sep. 7, 1859

Wm. Penick & Co.

J. Hubert Hagar

Dear Sir,

I was this morning after making several measurements near Brookland & Clay St. along Franklin St. to the entrance of the first court about west of Columbia St. to the interior of the college's residence and along brick college street to Columbia St. and then across Columbia St. to where it is intersected by Franklin St. and it would take 75 feet of pipe (when saved). This amount with the accidental length necessary of pipe to connect cerebral the college water would make 848.44 equal one mile, one half and 54.4 feet of pipe when laid and would require a 2nd holder of 200. The capacity as proposed for this college water, larger pipes near and about...
