be erected and devoted to recitation rooms and rooms for the Dialectic and Philanthropic Societies. Such a building might add eight or twelve public rooms to those we now have, and have on it a tower for the bell. Another plan proposed is to erect a building of a T shape the head of the T being three stories high and its stem two stories high. The stem of the T is to be devoted to a new Chapel—the first story of its head to recitation rooms, and the second and third stories to rooms for the Societies. The erection of this building will enable us to alter the present Chapel so as to afford ample accommodations to the Chemical department in both of its forms, and to the Mineralogical and Geological departments.

As to the position for this new building, it may not be within the province of the Committee to select one. It has been suggested to place it in a line with the South Building and the Library to either at its west or at its east end. Then if another building ever be needed it can be put parallel to the east of West buildings and as the symmetry of our present order be maintained. Another good position for it would be at the end of the Avenue where the Steward's hall stood. Then it would have an imposing aspect to all who enter the Campus at its present gate. Another place proper for this building is between the South Building and the main street of
